It seems to be the general belief in the departments at Washington, where the most interest is felt, that Mr. Cleveland intends making participation in politics beyond the common rights of suffage a sufficient excuss for removing officials of all grades, hence there is great uneasiness overwhere. Concressman Wallace who sufficient excuss for removing officials of all grades, hence there is great uneasiness everywhere. Congressman Wallace who has been interviewed by a correspondent of the Louisville Times, said: "It appears to me that Governor Cleveland intends by his letter to convey the impression that the great bulk of those holding office under civil service laws have violated the law, and should not expect its protection. If he means anything, he evidently means that those who took part in the late campaign, beyond the mere casting of their votes, have nullified their right to civil service protection, and that he will supercede them. I can not see anything in the letter that is encouraging to Federal office-holders of any class, and if I were one of them, I would, if I had been active in the late campaign, look for a request to resign, or the appointment of my successor, soon after Cleveland is insucurated."

The statistics of the Sheffield trade with the United States show an astonishing falling off. In 1881 it exported about \$2,000,000.

The Washington Star says the prospects of the bill to retire General Grant are not good. The bill passed the Senate he 13th of May last, and was placed on the Speaker's table in the House, where it now remains buried under one hundred and tweaty-seven other bills, without possible chance of resurrection. It has not even been referred to the House Military Committee, the chairman of which, General Rosecrat, is supposed to favor it. The only way it could be feached would be by taking it up by unanimous consent, and this is rendered out of the question from the fact that there is decided opposition to it.

The Courier-Journal in commenting upon Mr. Cleveland's letter says: It is at the same time the rule which will most make the Republicans wince, for perhaps fully four-fifths of their officials, from Cabinet members down, have notroinally fulfilled the conditions which the President-elect says shall insure their removal. It is a rule which, while it proves how general has been the prostitution of the service, is as sumsic to the ears of those who desire the Government administered on honest and businessilie principles.

Tunneling a Volcano.

Some enterprising Yankees have bought a volcano in Mexico, and are running a tunnel into it about half-way up the crater, through which they expect to draw off an enormous quantity of sulphur. Volcanoes in the buman system take the form of pimples, boils and carbuncles. The proceed from weak and impure blood, which thrown's Iron Bitters strengthens and purifies. Mr. Shank, of Petersburg, Va., says, "It caused the cruptions on his skin to entirely disappear."

Our Government can no longer be said to be an experiment. One hundred years of successful existence have established it as a permanent institution. The magnificent conduct of the people during the late election proves their patriotism, and the wisdom of our constitution. Our immense commercial interests also farnish convincing proof. We know of no better illustration of the success attending honorable and able business methods than the firm of D. M. Ferry & Co., Detroit, Mich, the leading seedamen of this country. From small beginnings, thirty years ago, they have built up their mammoth business by strict adherence to their initial principle of furnishing only the best seeds obtainable. They offer to send their valuable "Annual" free to all who expect to buy seeds or bulbs.
